

# Single Handle Faucet Ceramic Cartridge

This ceramic cartridge is a replacement part designed for single-handle faucets. It controls the flow and temperature of water, ensuring smooth and precise operation.

## Product Overview

### High-Performance Ceramic Cartridge

This ceramic cartridge is a precision-engineered replacement part designed specifically for single-handle faucets. Featuring durable ceramic disc construction, it ensures smooth, reliable temperature and flow control while offering exceptional resistance to wear. Its design prioritizes ease of installation and leak prevention, making it a dependable solution for faucet maintenance and repair.

## Technical Specifications

### Sealing Mechanism

Rubber Seals • Leak-Resistant

### Body Material

Beige plastic

### Water Flow Configuration

2 inlets, 1 outlet

## Performance Features

### Operational Highlights

**2 count**

Water Inlets

**1 count**

Water Outlet

### Core Technology

Ceramic Disc, Single-Handle Compatible, Wear Resistant
