

# Single-Head Electric Magnetic Pump Liquid Filling Machine

This electric magnetic pump filling machine features a single head for dispensing liquids. It is suitable for filling various liquids such as essential oils and perfumes.

## Overview

### Precision Liquid Filling Solution

This semi-automatic electric magnetic pump filling machine is engineered for high-precision liquid dispensing. Featuring a micro-computer control system and digital display, it ensures consistent and reliable performance for various laboratory and production environments. Its versatile design makes it suitable for filling a wide range of liquids, including oils, cosmetics, pharmaceuticals, and other non-granulated products.

## Technical Specifications

Filling Heads	1 heads
Pump Type	Magnetic Pump
Control System	Micro-computer Control
Interface	Digital Display

## Applications

### Viscosity Handling

Low Viscosity • High Viscosity • Non-granulated

### Compatible Liquids

Perfume, Essential Oil, Oral Liquid, Pharmaceuticals, Chemicals, Cosmetics, Food

## Service & Support

### Available Services

- 24-hour technical support via email or phone
- Operator and mechanic training
- Post-warranty maintenance support
- Spare parts provided at cost price

### Warranty Period

1 Year
