

Single Hook Elastic Fall Protection Lanyard

This single hook elastic lanyard is designed for fall protection. It features durable elastic webbing and self-locking snap hooks for secure connections.

Product Overview

Professional Grade Fall Protection

This single hook elastic fall protection lanyard is engineered for high-risk work environments, providing a blend of durability, safety, and operational flexibility. Featuring shock-absorbing technology and high-strength construction, it ensures reliable arrest performance while minimizing user impact. Its elastic webbing design effectively reduces trip hazards, making it an essential component for construction, maintenance, and industrial safety kits.

Technical Specifications

Material	100% Polyester
Lanyard Length	1.5 m
Elastic Webbing Width	25 mm

Performance & Safety

Breaking Strength

25 KN

Minimum Breaking Strength

Compliance

ANSI 359.13 2013

Components

Included Components

- 1pc Forging Large Hook
- 1pc Carabiner
- 1pc Energy Absorber
