

Single-Jet Water Meter with Digital Display

This single-jet water meter is designed for the precise measurement of water consumption. It features a robust brass body, digital display, and wired connection for remote data transmission.

Product Overview

Smart Metering Technology

This single-jet smart meter provides highly accurate and reliable measurement of water consumption for both residential and industrial environments. It is constructed with a durable brass body and a protective enclosure to withstand diverse environmental conditions. The integrated digital display ensures easy reading, while the wired connection enables efficient remote data transmission.

Physical Properties

Housing Material	Brass with black plastic protective enclosure
Port Configuration	Threaded Inlet, Threaded Outlet, Built-in Filter Screen

Technical Features

Interface	Digital Display
Measurement Type	Single-jet
Remote Capability	Yes
Connection Method	Wired connection
