

Single Layer Screened Computer Cable

This cable is designed for internal wiring and external interconnection of electronic equipment. It features a PVC sheath, aluminum mylar screening, PVC insulation, and tinned copper conductors.

Product Overview

Reliable Signal Transmission

This single layer screened computer cable is engineered for robust performance in computer and communication environments. Featuring high-quality tinned copper conductors and aluminum mylar shielding, it provides effective protection against electromagnetic interference. The cable is constructed with durable PVC insulation and a protective sheath, ensuring long-lasting reliability in sensitive data applications.

Technical Specifications

Rated Temperature	80
Rated Voltage	300 V

Construction & Materials

Conductor Material	Plain copper, Tinned copper
Insulation Material	Colour-coded PVC
Shielding	Aluminum mylar
Drain Wire	Tinned or plain copper strands

Compliance & Standards

Regulatory Standards

UL Subject 758 • UL 1581 • CSA C22.2 No.210.2
