

Single Needle Lockstitch Sewing Machine with Edge Trimmer

This is a single needle lockstitch sewing machine with an edge trimmer. It is designed for efficient and precise sewing operations in apparel and textile manufacturing.

Overview

High-Speed Precision Sewing

This high-speed single-needle flatbed lockstitch sewing machine is engineered for efficiency and precision in apparel and textile manufacturing environments. Equipped with an integrated edge trimmer, it streamlines production by allowing for simultaneous stitching and fabric trimming. This machine is designed to enhance overall productivity while ensuring consistent, high-quality stitch results for a variety of garment assembly applications.

Technical Specifications

Machine Type	Single-needle flatbed lockstitch
Key Features	Edge Trimmer, High-Speed Operation, Flatbed Design
Model Identifier	TY 8520N

Safety & Compliance

Operational Safety

- Turn off switch when changing bobbin
- Turn off switch when threading
- Turn off switch when cleaning or repairing
- Wear eye protection during operation
- Keep away from moving parts
