

Single Output PID Temperature Controller

This single-output PID temperature controller maintains stable temperatures in industrial environments. It features auto-tuning, universal TC/RTD input, and a bright LED display for clear readings.

Product Overview

Industrial PID Temperature Controller

The UTC-221P is a versatile single-output PID temperature controller designed for high-precision industrial, commercial, and domestic thermal management. It features a dual-display 3+3 digit LED system that allows for simultaneous monitoring of process and set values. With universal input compatibility for thermocouples and RTD sensors, along with auto-tuning functionality, this controller ensures reliable performance in heating and cooling applications.

Core Specifications

Control Method	PID, ON-OFF, Auto-tuning
Display	3+3 Digit, 7-Segment LED
Universal Input Support	J-Type Thermocouple, K-Type Thermocouple, PT-100 RTD

Performance Metrics

Key Performance Metrics

1 % Accuracy	6 Samples/Sec Sample Rate	120 db CMRR
------------------------	-------------------------------------	-----------------------

Physical and Environmental

Protection Rating	IP-65
Dimensions (H x W x D)	96 x 96 x 52 mm

Electrical Ratings

Relay/Signal Output

- 5A @ 230VAC/28VDC Resistive Load
- 12V DC, 30mA Signal Output
- 1C/O NO-C-NC Relay

Advanced Settings

PID Configuration Range

Parameter	Range
Proportional Band	0000 to 999.9
Integral Time	0000 to 999.9
Derivative Time	0000 to 999.9
