

# Single Phase 20A HVAC Contactor

This is a 20A single-phase contactor designed for HVAC applications. The magnetic AC contactor is suitable for switching electrical loads in air conditioning, refrigeration, and heating equipment.

## ADDITIONAL IMAGES

## Overview

### Reliable HVAC Switching

This definite purpose magnetic contactor is engineered for single-phase electronic AC applications, specifically tailored for HVAC&R systems. Designed for durability and efficient operation, it provides reliable switching for heating, cooling, and refrigeration equipment. The unit features robust construction to ensure a long service life in demanding electrical environments.

## Electrical Specifications

### Performance Ratings

**240 VAC**  
Voltage Rating

**50 lb-in**  
Terminal Torque

Rated Current	20 A
Phase Configuration	1-Phase
Coil Voltage	24-277V

## Compliance and Standards

### Quality Control

- 100% self-inspection
- Pre-packing testing

Certifications	OEM, ODM
----------------	----------

## Ordering Information

Production Lead Time	15-20 days after deposit
Payment Terms	30% deposit, balance against B/L copy
