

Single-Phase Digital Energy Meter

This single-phase electronic energy meter accurately measures active energy consumption. It features a digital display for easy reading and is suitable for residential and commercial applications, operating at 220V, 50Hz with a current range of 5(100)A.

Product Overview

Precision Energy Monitoring

This single-phase electronic energy meter is engineered for precise measurement of active energy consumption in both residential and commercial environments. It features a clear digital display for effortless monitoring and supports the tracking of both kWh and kvarh metrics. Designed for reliability, this unit integrates seamlessly into standard electrical systems.

Technical Specifications

Current Range

5 A

Base Current

100 A

Maximum Current

Operating Voltage 220 V

Frequency 50 Hz

Features

Measurement Units kWh, kvarh

Display Digital

Applications

Suitable Environments

- Residential
- Commercial
