

# Single Phase Digital Watt-Hour Meter

This static single phase watt-hour meter is designed for measuring electrical energy consumption. It operates at 220V, with a current rating of 5(20)A at 50Hz and features a digital display and an impulse output of 3200imp/kWh.

## Product Overview

### Precision Energy Monitoring

This static single-phase watt-hour meter is engineered for accurate electrical energy consumption measurement in residential or commercial environments. Featuring a clear digital display, it provides reliable data tracking at 220V and 50Hz. The unit is designed for durability and precision, offering an impulse output of 3200imp/kWh for integration into monitoring systems.

## Technical Specifications

### Rated Current

**5 A**

Base Current

**20 A**

Max Current

### Meter Type

Static • Single Phase • Digital

### Rated Voltage

220 V

### Frequency

50 Hz

### Impulse Output

3200 imp/kWh

## Compliance and Standards

### Certifications

CE, ISO 9001
