Product Overview

Industrial Lifting Performance

This 220V electric wire rope hoist is engineered for efficient load management in workshops, garages, and construction sites. Featuring a robust 1650W motor and dual-line lifting capabilities, it offers reliable power for tasks up to 1000kg. With integrated double limit switches and an automatic braking system, this unit prioritizes operator safety and precise load control during intensive operation cycles.

Performance Specifications

Lifting Capacity & Speed

500 kg

Single Line Capacity

1000 kg

Double Line Capacity

9 m/min

Single Line Speed

4.5 m/min

Double Line Speed

Technical Details

Operating Parameters

Parameter	Value
Motor Power	1650 W
Voltage	220 V
Cable Diameter	5.6 mm
Single Line Height	12 m
Double Line Height	10 m

Safety & Features

Operational Safety

Double Limit Switches, Automatic Brake, Wired Remote Control, Heavy-duty Toggle Switch

Operational Limits

Duty Cycle

20 %
