

Single Phase Electronic Energy Meter 10A (40A Max) 220V

This single-phase electronic energy meter measures electrical energy consumption. It operates at 220V and supports a current of 10A, with a maximum of 40A.

Product Overview

Professional Grade Single-Phase Meter

This high-precision single-phase, two-wire electronic energy meter is designed for accurate electrical energy consumption tracking in both residential and light commercial environments. It features a robust 10A(40A) rating and an impulse output of 1000 imp/kWh for precise monitoring. The unit is built for durability, reliability, and ease of integration into standard energy management systems.

Technical Specifications

Impulse Constant

1000 imp/kWh

Impulse Rate

Rated Voltage	230 V
Current Rating	10A (40A Max)
Frequency	50 Hz

Features & Compliance

Key Features

- Digital Display
- Modbus-RTU Communication support
- Pulse Output
- Tamper-proof design
- Low power consumption

Certifications	CE, IEC62053-21
