

Single-Phase Energy Meter 220V 5(20)A

This is a single-phase electricity meter designed for measuring energy consumption. It operates at 220V with a current rating of 5(20)A and measures energy up to 720 kWh.

Overview

Reliable Energy Measurement

This single-phase energy meter is designed for accurate electricity consumption monitoring in residential or small commercial settings. Operating at a standard 220V voltage and 50Hz frequency, it provides consistent performance for energy management. Built to comply with GB/T15283-94 standards, this unit ensures reliable measurement for your electrical infrastructure.

Technical Specifications

Rated Current

5 A

Base Current

20 A

Maximum Current
