

Single-Phase Motor Manual Control Box - 1.5kW

This control box is designed for manually operating single-phase motors up to 1.5kW (2HP). It is suitable for applications requiring manual control of single-phase motors.

Product Overview

Professional Manual Motor Control

This manual control box is specifically engineered for reliable operation of single-phase motors. It supports motor power ratings up to 1.5kW (2HP), making it a versatile solution for pump management and other motor-driven systems. Designed for straightforward manual control, it provides a robust interface for essential operational requirements.

Technical Specifications

Maximum Power	1.5 kW
Maximum Power (HP)	2 HP
Phase Type	Single-phase
