

Single Phase Multi-Tariff Energy Meter

This single-phase multi-tariff energy meter is designed for the accurate measurement of electrical energy consumption. It operates at 220V and 50Hz, measuring both kWh and kvarh.

Product Overview

Smart Energy Management

The DOSF-1Y is a high-precision single-phase multi-tariff energy meter engineered for reliable electricity monitoring in residential and commercial environments. It provides comprehensive energy usage data by measuring both kWh and kvarh, ensuring accurate billing and consumption analysis. With a robust design and a clear digital display, this meter is a dependable solution for modern utility management needs.

Technical Specifications

Rated Voltage	220 V
Rated Frequency	50 Hz
Current Rating	5/100(4)A
Measurements	kWh, kvarh
