

Single Phase Power Plug with Protective Cover

This is a robust, single-phase power plug designed for outdoor use. It features a hinged yellow protective cover with IP44 rating and a built-in switch with a transparent red indicator, allowing for easy power control.

Product Overview

Robust Outdoor Power Connectivity

The GES-159 is a durable, single-phase power plug specifically engineered for demanding outdoor environments. Featuring a protective hinged cover and an IP44 ingress protection rating, it effectively safeguards against water splashes and solid objects. Built with a convenient integrated switch and a clear indicator light, this unit provides both reliability and ease of use for standard European socket configurations.
