

Single-Phase Pump Motor Control Box

This manually operated control box is designed for single-phase motors with a power rating of no more than 1.5KW (2HP). It is suitable for various pump applications requiring manual operation.

Product Overview

Professional Pump Control Solution

This manually operated control box is designed specifically for single-phase motor applications up to 1.5 kW (2 HP). It provides reliable control for various pump systems, including irrigation and drainage setups. Engineered to meet international safety and environmental standards, it ensures dependable performance in demanding operational environments.

Technical Specifications

Maximum Motor Power

1.5 kW

Max Power

2 HP

Max Horsepower

Phase Type

Single-phase

Operation Mode

Manual

Compliance & Standards

Certifications

CCC, GS, CE, RoHS

Applications

Recommended Applications

- Drainage systems
- Irrigation systems
