

Single Phase Two-Wire Energy Meter

This single-phase two-wire electronic energy meter is designed for measuring active energy consumption. It operates at 230V with a current range of 10(80)A and a frequency of 50-60Hz.

Product Overview

Precision Energy Monitoring

This single-phase two-wire electronic energy meter is engineered for precise measurement of active energy consumption in both residential and commercial environments. It features a high-contrast digital display for clear readings and reliable performance across a standard frequency range. Designed for durability and ease of installation, this unit provides a robust solution for energy management.

Technical Specifications

Rated Voltage	230 V
Current Range	10(80)A
Operating Frequency	50-60Hz
Pulse Constant	1000 imp/kWh

Compliance and Standards

Certifications	CE
