

Single Phase Water Pump Control Box

This control box is designed for single-phase water pumps with a motor power of up to 1.5KW (2HP). It features robust construction with IP40S1 protection and is CE certified for 220-230V applications.

Product Overview

Professional Single-Phase Control Solution

This manually operated control box is engineered for single-phase water pump systems, supporting motor powers up to 1.5KW (2HP). Designed for reliability and safety, it features a robust build with IP40S1 protection for demanding environments. The unit includes multilingual safety warnings and is optimized for simple installation in 220-230V applications.

Technical Specifications

Voltage Range	220-230V
Maximum Motor Power	1.5 KW
Maximum Horsepower	2 HP
Protection Rating	IP40S1
Frequency	50 Hz
Operating Speed	2850 min

Compliance & Features

Certifications	CE
Operation Mode	Manual
