

Single Pole 30A 24V Magnetic Contactor

This single pole magnetic contactor is rated for 30A and operates on a 24V coil. It is designed for switching electrical circuits in HVAC systems, lighting control, and other industrial applications.

Product Overview

Reliable Switching Solution

This single pole magnetic contactor is engineered for demanding HVAC and industrial electrical applications. It provides robust performance for switching compressors, fans, and other heavy-duty electrical loads. Designed for safety and efficiency, this compact unit ensures reliable operation in both commercial and industrial environments.

Electrical Ratings

Rated Current

30 A

Rated Current

Coil Voltage

24VAC

Frequency

50/60Hz

Technical Specifications

Pole Configuration

1.5 Pole

Model Identifier

SA-1.5P-30A-24V

Applications

Common Applications

HVAC Systems, Refrigeration, Compressor Control, Fan Switching, Lighting Control
