

# Single Pole Light Switch with Fluorescent Indicator

This is a single-pole, single-throw (SPST) light switch. It features a fluorescent strip indicator for visibility in low-light conditions and is suitable for residential and commercial lighting applications.

## Product Overview

### Designed for Versatility and Durability

This single pole light switch is engineered for both residential and commercial lighting control. It features a built-in fluorescent indicator for easy visibility in low-light conditions and is constructed with a robust metal bracket on the back for enhanced structural support. The design prioritizes modularity, allowing for easier panel customization and flexible installation options.

## Key Features

### Design Highlights

- Fluorescent indicator for low-light visibility
- Modular panel design for easy customization
- Metal back bracket for structural support
- Compatible with small and wide button configurations
