

Single-Pole Miniature Circuit Breaker

This is a single-pole miniature circuit breaker (MCB) designed for overcurrent and short-circuit protection. It features a green toggle switch for manual operation and visual indication of circuit status.

Product Overview

Reliable Circuit Protection

This single-pole miniature circuit breaker (MCB) is engineered to provide essential overcurrent and short-circuit protection for electrical installations. Designed for versatility, it is suitable for a wide range of residential, commercial, and industrial applications. The unit features a distinct green toggle switch, allowing for easy manual operation and clear visual indication of the circuit status.
