

Single Pole Neutral Miniature Circuit Breaker

This is a single-pole plus neutral (SPN) miniature circuit breaker (MCB) designed for residential and commercial electrical protection. It features a C16 tripping characteristic, a rated voltage of 230V, and a breaking capacity of 3000A and complies with IEC60898 standards.

Overview

Compact Electrical Protection

This Single Pole Neutral (SPN) miniature circuit breaker is designed for reliable electrical protection in residential and light commercial applications. Featuring a 1P+N configuration, it offers a compact solution for modern electrical distribution systems. It is engineered to meet international safety standards, ensuring consistent performance for overload and short-circuit protection.

Technical Specifications

Rated Voltage	230 V
Rated Current	16 A
Breaking Capacity	3000 A
Tripping Characteristic	C-Curve
Pole Configuration	1P + N

Standards & Compliance

Compliance Standards	IEC60898, CE
----------------------	--------------

Installation

Mounting	DIN Rail
