

Single Port Data Wall Plate with Polished Brass Finish

This single port data wall plate is finished with polished brass and features sloped edges. It is designed for mounting a standard data connection point in a wall.

Product Overview

Elegant Connectivity Solution

This single port data wall plate combines functional reliability with a premium polished brass finish, making it an ideal choice for high-end office and commercial environments. The sloped-edge design offers a sophisticated aesthetic while ensuring a flush, secure fit against the wall surface. Engineered for durability, it provides a stable mounting point for standard data cabling systems.
