

Single Press Fruit and Vegetable Juicer

This single pressing juicer efficiently extracts juice from fruits and vegetables, separating the pulp. Its compact design and easy-to-clean components make it suitable for home use.

Product Overview

Professional Quality Juicing

The Single Press Fruit and Vegetable Juicer features a streamlined, modern design crafted from advanced food-hygiene grade materials. It utilizes cutting-edge motor technology to provide strong, reliable performance for consistent juice extraction. Designed for efficiency, the system includes a specialized blade assembly and effective pulp-separation technology to ensure high yield and a smooth, clean final product.

Technical Specifications

Blade Material	Well-alloy
Safety Features	Splash-proof inner cover, Dual protection system, Overheat protection

Features

Core Benefits

- High-efficiency juice extraction
- Complete pulp and juice isolation
- Advanced food-grade material construction
- High-endurance motor technology
