Product Overview

Professional Surface Preparation

This single row diamond grinding wheel is engineered for high-efficiency material removal on concrete, stone, and various hard surfaces. Its robust construction ensures consistent performance and minimal vibration, making it an ideal choice for smoothing rough surfaces, removing coatings, and shaping edges. Designed with integrated cooling holes, the wheel promotes effective debris removal and extended tool longevity for demanding professional applications.

Technical Details

Primary Applications

- Surface smoothing
- Coating removal
- Edge shaping

Segment Design	Single Row
Cooling & Debris Management	Yes
Compatible Materials	Concrete, Stone, Hard Materials
