Product Overview

Professional Schuko Power Solution

This Single Schuko Power Outlet with a protective lid is engineered for environments where safety and protection against environmental elements are paramount. With an IP44 ingress protection rating, it effectively shields against splashing water and dust, making it an excellent choice for kitchens, bathrooms, and sheltered outdoor areas. The sleek, durable design combines functionality with elegant aesthetics, backed by decades of electrical manufacturing expertise to ensure reliable power distribution.

Technical Specifications

IP Rating

IP44

Model Number

S81/16UW

Electrical Rating

16 AX at 250 V AC 50/60 Hz

Electrical Durability

10000 cycles

Dielectric Strength

2000 V

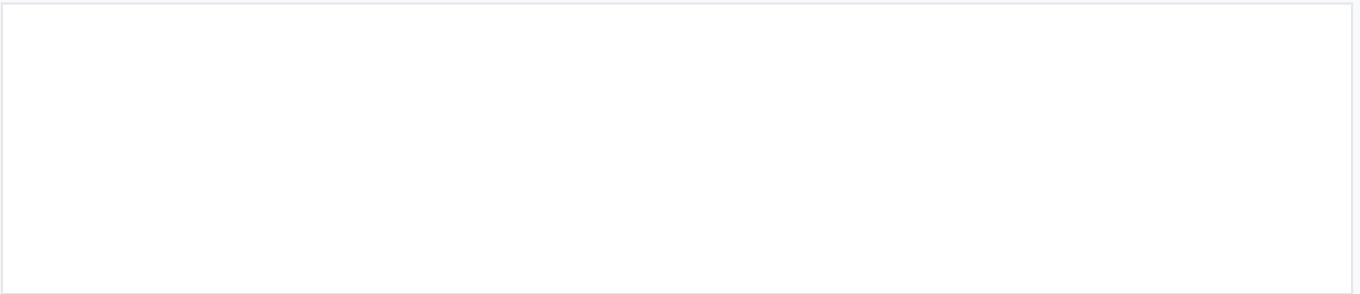

Design and Materials

Customize your installation with various frame materials and aesthetic designs.

Housing Material	Fire-resistant Polycarbonate (PC)
Color Options	White, Customizable

Installation and Compatibility

Detailed dimensions and mounting specifications for seamless integration.

Terminal Types

- Screwless terminals
- Screw terminals
