

Single-Speed Bicycle Freewheel

This bicycle freewheel is designed for smooth and reliable single-speed drivetrain performance. Its durable steel construction and precision-cut teeth ensure optimal chain engagement and longevity.

Product Overview

High-Performance Single-Speed Component

This single-speed bicycle freewheel is engineered for smooth and reliable drivetrain performance. Constructed from durable steel, it features precision-cut teeth that ensure optimal chain engagement and a robust internal mechanism for long-term reliability. It is an ideal choice for single-speed conversions, BMX applications, and fixed-gear bike setups.

Technical Specifications

Key Design Elements

- Precision-cut teeth
- Robust internal mechanism
- High-durability steel build

Construction Material	Durable Steel
Compatible Applications	Single-speed conversion, BMX, Fixed-gear
