

Single-Speed Bicycle Freewheel

This bicycle freewheel is designed for single-speed or fixed-gear drivetrains, enabling unidirectional power transfer from the pedals to the rear wheel. Constructed from durable metal, it ensures reliable performance and longevity under various riding conditions.

Product Overview

Reliable Drivetrain Component

This single-speed bicycle freewheel is an essential component for single-speed and fixed-gear drivetrains, enabling efficient unidirectional power transfer from the pedals to the rear wheel. Engineered for durability, the metal construction ensures reliable performance and longevity across various riding environments. It serves as an ideal solution for both standard replacements and custom bicycle builds, providing smooth, consistent operation for the end user.

Technical Details

Compatibility	Single-speed, Fixed-gear
Material	Durable metal
Primary Function	Unidirectional power transfer

Application

Suitable Applications

- Bicycle maintenance and replacement
- Custom bicycle assembly
- Single-speed drivetrain conversion
