Overview

Professional Woodworking Drilling Solution

The single spindle boring machine is a high-efficiency tool designed for accurate horizontal and vertical drilling in solid wood, shavings, and MDF. It features a pneumatically tiltable boring unit with versatile 0°, 45°, and 90° settings to accommodate complex mortise processes. Built for precision and ease of operation, this machine is an essential asset for high-volume woodworking production lines.

Technical Specifications

Spindle Configuration

21 pcs

Number of Bits

32 mm

Distance Between Spindles

2840 rpm

Spindle Speed

Performance Parameters

1.5 KW

Motor Power

50 mm

Max Drilling Depth

0.6 Mpa

Air Pressure

Physical Attributes

Dimensions & Weight

Attribute	Measurement
Outline Size	1100 x 1400 x 1300 mm
Net Weight	380 KG

Features & Compatibility

Key Features

- Pneumatically tiltable boring unit (0°, 45°, 90°)
- Foldable guide bar for rip fence
- Supports both horizontal and vertical drilling
- Pneumatic foot pedal for clamping and drilling
- Quick-change chuck system

Compliance

CE Certified
