

Single-Stage Centrifugal Pump

This single-stage, single-suction centrifugal pump is designed for various industrial applications. Its robust construction ensures reliable performance and longevity.

Product Overview

Engineering Excellence

The XA series pump is a single-stage, single-suction centrifugal pump engineered for high-performance fluid transfer in industrial settings. Its robust construction ensures long-term durability and reliable operation even under demanding conditions. The design facilitates consistent flow rates and moderate pressure, providing a cost-effective solution for diverse liquid handling needs. Simplified maintenance and an anti-clog configuration make it a dependable choice for professional industrial applications.
