

Single-Stage Double-Suction Centrifugal Pump

This single-stage double-suction centrifugal pump is designed for high performance and reliability. It is suitable for pumping clean water or liquids with similar physical and chemical properties in various applications.

Product Overview

High-Performance Centrifugal Pumping

The SLO(W) series is a professional-grade single-stage double-suction centrifugal pump engineered for high-efficiency fluid transport. Featuring a robust horizontally split casing and a balanced double-suction impeller, this unit provides exceptional hydraulic performance and reliable operation. It is an ideal solution for demanding applications in water supply, industrial processes, and large-scale irrigation.

Technical Specifications

Compatible Fluids

- Clean water
- Liquids with similar physical properties
- Liquids with similar chemical properties

Suction Configuration	Double-Suction
Casing Design	Horizontally Split

Performance

Primary Applications	Water Supply, Irrigation, Power Plants, Industrial Processing
----------------------	---
