

# Single System Computerized Flat Knitting Machine

This flat knitting machine offers a versatile solution for producing various knitted fabrics. Featuring a computerized control system and a single system carriage, the machine allows for high-speed knitting with precise control.

## Overview

### Efficient Knitting Solution

This single system computerized flat knitting machine provides a versatile and efficient solution for producing a wide range of knitted fabrics. It features a high-speed carriage with precise control over stitch formation, ensuring consistent and high-quality output for various textile applications. Designed for both small-scale and large-scale production, the machine offers robust construction and reliable components to minimize downtime and maximize productivity.

## Technical Specifications

Model Number	GSJX-1-52
System Type	Single System

## Key Features

### Operational Capabilities

- Computerized control system
- High-speed knitting carriage
- Precise stitch formation control
- Easy pattern programming
- Robust construction

## Application

Ideal Applications	Garment Manufacturing, Textile Production, Small-scale Production, Large-scale Production
