

Single Tile Molding Machine

This single tile molding machine is designed for efficiently producing single tiles with precision. It utilizes advanced molding techniques to ensure consistent tile dimensions and quality.

Overview

CX8 Single Tile Molding Machine

The CX8 is a specialized industrial molding machine engineered for the efficient, high-volume production of single tiles. Designed with robust construction and advanced molding techniques, it ensures consistent dimensions and high-quality output while optimizing floor space. This unit integrates automated systems to streamline manufacturing processes, helping to reduce labor costs and improve overall production reliability.

Technical Specifications

Motor Power

5.5 KW

Motor Power

Spindle Material	No. 45 steel
Roller Diameter	70 mm
Chain Type	16 A

Performance

Cutting Precision	± 2 mm / 10 m
