

Single Wheel Barrow with Pneumatic Tire

This wheel barrow is designed with a tubular frame and a single pneumatic tire. It is suitable for transporting materials in construction, gardening, or landscaping applications.

Product Overview

Robust Material Handling

This single wheel barrow is a versatile tool engineered for efficient material transport in construction, landscaping, and gardening environments. Featuring a durable tubular frame and a reliable pneumatic tire, it ensures stability and ease of movement over various terrain types. The design incorporates a supportive fabric bed, making it a dependable solution for moving bulky or loose materials on the job site.

Design & Construction

Model Identifier	TC1001A
Frame Material	Tubular Steel
Color	Red

Wheel System

Wheel Type	Pneumatic Tire
Number of Wheels	1

Applications

Primary Applications	Construction, Gardening, Landscaping
