Product Overview

Durable Electrical Control Solutions

This series of light switches provides a reliable and robust solution for residential and commercial lighting management. Engineered with high-quality components including copper sheets and silver contacts, these switches offer excellent electrical conductivity and performance. The design utilizes flame-retardant materials for enhanced safety and is highly popular in African markets for its consistent quality.

Technical Specifications

Materials & Construction

- Bakelite panel
- PC base
- Copper sheet electrical contacts
- Silver contact points
- Flame-retardant nylon cover sheet
- Screw iron hardware

Key Features

Flame Retardant, Bakelite Construction, High Conductivity, Africa Market Proven

Configuration Options

Available Models

Type	Function
Single Gang	Single pole light control
Double Gang	Dual independent circuit control
Triple Gang	Triple lighting circuit control
