

Sink Strainer Assembly

This sink strainer assembly is used in sinks to prevent debris from entering the drainpipe. It features a strainer basket, a central post with a knob, and mounting hardware.

Product Overview

Professional Sink Strainer Assembly

This sink strainer assembly is designed for reliable performance in both kitchen and bathroom sink environments. Engineered to prevent debris from clogging drainpipes, it features a functional strainer basket with precision perforations for optimal water flow. The unit includes a central post with a convenient knob for drain-stopping capabilities and comes complete with robust mounting hardware to ensure a secure, watertight seal.

Technical Specifications
