

Sintered Hot-Pressed Diamond Saw Blade

This sintered hot-pressed saw blade is designed for cutting various materials. It features a durable construction with a diamond-impregnated cutting edge for efficient cutting.

Product Overview

Professional Precision Cutting

This sintered hot-pressed diamond saw blade is specifically engineered for high-performance cutting of hard porcelain and vitreous tiles. By combining the smooth finish of a continuous rim with a specialized slotted core for stress relief, it ensures chip-free results. It offers versatility for both wet and dry applications, making it a robust choice for demanding professional environments.

Performance Features

Application Type

Wet Cutting • Dry Cutting

Material Compatibility

Porcelain, Vitreous Tile, Hard Tile

Design Specifications

Rim Configuration

X-rim continuous with slotted core

Production Method

Sintered hot-pressed
