

Sintered Segmented Rim Saw Blade

This sintered saw blade is designed for precision cutting of hard materials. It features a segmented rim for efficient debris removal and reduced heat buildup.

Product Overview

High-Performance Cutting Solution

This sintered segmented rim saw blade is specifically engineered for precision cutting in demanding industrial applications. The advanced segmented rim design facilitates efficient debris removal and actively minimizes heat buildup during operation. Built from high-quality materials, this blade offers exceptional longevity and durability, ensuring clean, accurate cuts with minimal material chipping.

Technical Specifications

Cutting Applications	Wet Cutting, Dry Cutting
Rim Design	Segmented
Construction	Sintered

Performance Features

Operational Advantages

- Efficient debris removal
- Reduced heat buildup
- Minimal chipping
- High-durability construction
