

SIP VoIP Gateway

This VoIP gateway converts voice traffic between traditional telephone networks and IP networks. It supports SIP, features FXS ports for analog phones, and includes an Ethernet port for IP network connectivity.

Product Overview

Versatile VoIP Connectivity

This 8-port VoIP gateway is designed to bridge analog telecommunications with modern IP-based networks. It seamlessly integrates traditional telephone equipment such as PBX systems, facsimile machines, and POS terminals into your existing core network. With broad protocol support and robust audio processing features, it ensures reliable communication for professional environments.
