

# Sisal Fiber Buffing Wheel

Sisal fiber buffing wheels are made from layered sisal fabric. They are designed for aggressive cutting action in heavy-duty polishing and deburring applications on metal surfaces.

## Product Overview

### Heavy-Duty Polishing Performance

The Disc Sisal Buff (DS) is engineered for aggressive cutting action, making it an essential tool for heavy-duty polishing and deburring tasks. Crafted from layers of natural agave fiber, this wheel effectively removes scratches, surface imperfections, and scale during the initial stages of metal finishing. Its robust construction ensures durability and consistent performance across various industrial applications.

## Technical Details

### Customization Options

- Various diameters
- Multiple thicknesses
- Different density levels

Material	Natural Sisal Fiber (Agave Plant)
Primary Use	Heavy-duty polishing, Deburring, Initial metal finishing, Scale removal
Compatibility	Compatible with various polishing compounds for versatile surface finishes
