

Six-Passenger Electric Patrol Vehicle

This six-passenger electric patrol vehicle is designed for efficient and eco-friendly transportation. Its compact size and maneuverability make it ideal for navigating crowded or confined spaces.

Overview

Efficient Multi-Passenger Transport

The LQX062 is a versatile six-passenger electric patrol vehicle designed for efficient, eco-friendly transportation in diverse environments. Featuring an open-air design with a protective roof, it offers passengers an unobstructed view while ensuring comfort in various weather conditions. Its compact size and electric motor make it an ideal solution for patrol duties, sightseeing tours, and general transportation in resorts, parks, and industrial complexes.
