

Six-Spoke Matte Black Aluminum Alloy Wheel

Aluminum alloy wheels deliver optimal strength with a lightweight design. The six-spoke design enhances structural integrity and promotes efficient heat dissipation.

Product Overview

High-Performance Six-Spoke Alloy Wheels

The 10420 model is a high-performance aluminum alloy wheel engineered for optimal strength and lightweight characteristics. Featuring a classic six-spoke design, it enhances structural integrity while promoting efficient heat dissipation for improved brake cooling. The durable matte black finish provides excellent corrosion resistance, making it a reliable and aesthetic upgrade for a wide range of vehicle applications.

Technical Specifications

Available Sizes

Diameter (inches)	Width (inches)
15	8
16	8.25
17	8.25
17	9.25
18	8.5
18	9.5
19	8.5
19	9.5

Material

Aluminum Alloy

Design & Finish

Spoke Configuration

6

Spokes

Surface Finish

Matte Black Coating

Compliance & Quality

Quality Standards

VIA, JWL

Performance Features

Performance Benefits

- Enhanced structural integrity
- Efficient heat dissipation
- Superior corrosion resistance
- Precision-engineered for balance
- Improved handling and driving dynamics
