

# Size D Zinc-Manganese Primary Battery

This is a size D (R20P) high-power battery. It is commonly used in devices requiring a larger power source.

## Product Overview

### High-Power Zinc-Manganese Battery

This Size D (R20P) zinc-manganese dry battery is engineered for devices requiring a reliable, larger power source. Featuring a durable metallic casing and high-power output, it is designed for consistent performance in standard high-drain applications. This is a non-rechargeable primary battery.

## Technical Specifications

Battery Size	Size D (R20P)
Chemistry	Zinc-Manganese
Rechargeable	No

## Physical Characteristics

Form Factor	Cylindrical
Casing Material	Metallic

## Compliance & Features

Environmental Compliance  
0% Mercury
