

Skid-Steer Loader

This is a skid-steer loader designed for construction work. It features a front-mounted bucket and heavy-duty tires.

Overview

Versatile Skid-Steer Loader

This compact skid-steer loader is engineered for high maneuverability and efficiency in confined job sites. Featuring a robust front-mounted bucket and heavy-duty tires, it is designed to handle demanding construction and landscaping tasks with ease. Its compact frame ensures reliable performance where larger machinery cannot operate, making it an essential asset for versatile site operations.

Technical Specifications

Equipment Type

Construction Vehicle • Skid-Steer Loader
