Product Overview

High-Performance Hydraulic Breaker Attachment

This hydraulic breaker attachment is engineered for heavy-duty demolition, concrete breaking, and asphalt removal in road construction and infrastructure projects. It features a robust design that ensures high impact force while maintaining the maneuverability required for work in confined spaces. The unit is optimized for quick installation and reliability, significantly enhancing the utility and productivity of standard skid steer loaders.

Technical Features

Attachment System	Hydraulic Quick-Coupler System
Primary Applications	Demolition, Concrete Breaking, Asphalt Removal, Road Construction

Engine and Hydraulics

Compatible Engines

- Perkins Diesel Engine
- Mitsubishi Diesel Engine
- Xinchai Diesel Engine

Pump Type	US Permco Gear Pump

Operator Comfort and Safety

Cab Specifications

- Anti-collision safety cage
- Integrated seat belts
- 15-20% increased interior room
- Optional seat warmer and air conditioner

Control Interface	Italy Hydrocontrol Pilot Joystick
