Product Overview

Versatile Ice Breaking Solution

This specialized skid steer loader is engineered for high-performance ice breaking and pavement maintenance in challenging winter conditions. It combines a robust structural chassis with a high-torque hydraulic system to ensure effective defrosting and road clearing capabilities. Designed for operator comfort and maintenance efficiency, it provides a reliable, powerful solution for municipalities and road maintenance crews.

Core Specifications

Compatible Engines	Perkins, Mitsubishi, Xinchai
Hydraulic System	US Permco Gear Pump
Control System	Italy Hydrocontrol Pilot Joystick

Features

Cab Features

- Wider cab design (15%-20% more space)
- Anti-collision safety cage
- Seat belt protection
- Optional seat warmer
- Optional air conditioner

Serviceability	Easy-access upper and back hood for inspection and fluid filling without moving loading arms
