Product Overview

High-Performance Milling Attachment

This versatile milling attachment is engineered for demanding road construction and pavement maintenance tasks. Designed to integrate seamlessly with skid steer loaders, it offers exceptional maneuverability and precision for surface milling and preparation. Its robust construction ensures reliable performance in diverse working conditions, making it a highly productive solution for pavement recycling and road repair projects.

Key Features

Performance Highlights

20 %

Cab Space Increase

Design Advantages

Solid Chassis Structure, Vertical Lift Capability, Quick Hydraulic Coupling, Ergonomic Pilot Control

Technical Specifications

Engine Compatibility

- Diesel Engine Support
- Fuel Efficient Design

Hydraulic System

Gear Pump system with vertical lift capability for maximum reach and height.

Maintenance & Comfort

Operator Comfort Features

Wider Cab • Front Door Seal • Seat Belt • Anti-collision Cage • Optional Air Conditioning • Optional Seat Warmer

Maintenance Accessibility

Simplified inspection and filling process via upper and back hood access without moving loading arms.
