Product Overview

High-Efficiency Trenching Solution

This chain-type trencher attachment is designed to significantly improve excavation quality and efficiency for skid steer loaders. Engineered for versatility, it supports both single and double chain configurations to handle various soil conditions and ditch requirements. With a high operational speed and robust construction, it provides a reliable, practical solution for professional utility installation and construction projects.

Performance Metrics

Excavation Speed

500 m/h
Min Speed

700 m/h
Max Speed

Technical Specifications

Power Requirement	140 HP
Minimum Power Requirement	60 HP
Max Trench Depth	1.5 m
Trench Width Range	13 - 55 cm
Chain Configuration	Single Chain, Double Chain

Certifications & Standards

Compliance

CE • TÜV • UKAS
