

Skid Steer Loader with 1718 lb Operating Capacity

This skid steer loader has a 1718 lb operating capacity and a tipping load of 3439 lb. Its compact size and maneuverability make it suitable for confined spaces.

Overview

High-Performance Skid Steer Loader

This versatile skid steer loader is engineered for high reliability and environmental efficiency. Featuring an optimized hydraulic system and a streamlined design, it offers exceptional maneuverability and structural integrity for demanding work environments. The machine includes advanced features like an automatic hydraulic leveling mechanism to ensure operator safety and consistent performance during lifting tasks.

Technical Specifications

Capacity Metrics

1718 lb

Rated Operating Capacity

3439 lb

Tipping Load

6070 lb

Operating Weight

Engine Configuration

Parameter	Value
Engine Model	490BPG
Engine Power (Perkins 403C-22)	47.8/48.5 HP/PS

Key Features

Key Operational Benefits

- Environmentally friendly design with leakage-free hydraulic system
- International standard motor for reduced noise and fatigue
- Streamlined structure for improved aesthetics and maintenance access
- Automatic hydraulic leveling mechanism for parallel load movement
- Optimized rigidity and structural integrity

Compliance

CE, Environmentally Protected
